

## **Personal Classroom Management Philosophy**

Christian Mills

**I believe that students can be the best teachers to their peers. I also believe an epiphany or stroke of genius can occur at any moment in a students time in class. I do not disagree with some noise in my class. I will request that my students be at their desks when the bells rings, an empty desk means an absent or tardy student. I believe that the most important rule in the classroom is respect. It is not always the teacher that has the most important thing to say. I believe in allowing the students to determine appropriate or inappropriate behaviors along with consequences and rewards. This is how I will manage my classroom.**
